TABLE OF CONTENTS

GENERAL SESSIONS

Industrial Engineering in Europe Today—Challenge for Survival
Serge A. Birn and Eric G. Brightford 3

Systematic Maintenance Planning
Roland S. Hanson 8

Measuring the Contribution of the Industrial Engineering Function to the Success of a Business
R. A. Olsen 13

Reddy Information System
J. N. Salapatas 23

Investment Analysis Using Computer Models
Raphael R. Thelwell 30

An Experiment in Industrial Engineering Education
Charles R. White and Joe H. Mize 44

AEROSPACE

Wagon Wheels and Aerospace: A Hub-Wheel Facilities Concept
N. A. Friedman 53

Improvement Must Be Managed
Herbert F. Goodwin 64

Decision-Making for Project Managers
Michael J. Vaccaro 72

DATA PROCESSING AND INFORMATION SYSTEMS

Simplified Operational Manufacturing Systems
Jack F. Duston 79

A Control System for Airline Maintenance
Truman Evans 84

ENGINEERING ECONOMY

Profit Improvement Through Investment Decisions
Frank E. Cotton, Jr. 93

The Common Denominator in Selecting New Sites
William B. Speir 99

Establishing a Corporate Risk Policy
Carl S. Spetzler 103

Cardinal Utility Theory—Its Potential and Its Problems
Ralph O. Swalm 112

GOVERNMENT

$P = (IE)^s$—A Perspective of Industrial Engineering
William F. Flanagan 119

The Perennial Question: What Size the Basic Organizational Unit?
Ernst S. Valfer and Gideon Schwarzbart 130

HOSPITAL AND HEALTH SERVICES

A Computerized Hospital Information System
Said Ashour 141

Simulation of Operating Room Scheduling Policies
Jay Goldman and H. Allan Knappenberger 148

INDUSTRIAL AND LABOR RELATIONS

A Fair Day's Work Is Anything You Want It to Be
Bertram Gottlieb 155

Recent NLRB and Court Decisions That Should Be Noted by Industrial Engineers
Charles A. Werner 163

MANAGEMENT

Management Looks at Quality Control in Maintenance
John L. Grizzard 169

Organization for Cost Reduction
Walker T. Howell 177

OPERATIONS RESEARCH

Critical Path Resource Allocation for Job Shop Scheduling
Andre F. Block 183

Taking the Heat off the School Lunchroom
Raymond P. Lutz, Clark A. Mount-Campbell and Kenneth S. Wynn 188

On Selecting the Most Economical Scheme for Allocating Safety-Stock Investments
William O. Miller 198

Mathematical Formulation: A Problem in Design
A. Alan B. Pritsker, Lawrence J. Watters and Philip M. Wolfe 205

Long-Range Planning for Solid Waste Management: A Systems Perspective
B. C. Spradlin 211

PLANT LAYOUT AND MATERIALS HANDLING

A Review of Assembly Line Balancing Algorithms
John M. Cauley 223

A General Line Balancing Model
David R. Freeman 230

New Directions in Assembly Line Balancing
C. L. Moodie 236

QUALITY CONTROL AND RELIABILITY ENGINEERING

Gamma and Weibull Life Quality Plots
John H. K. Kao 245

RESEARCH AND DEVELOPMENT

Electromyography and Work Study
Terrence W. Faulkner 255

Algorithmic Solutions to Practical Problems of Network Scheduling
Francis B. Kapper 261

The Effectiveness of the Maximum Prospective Value Criterion for Capital Budgeting Decisions
R. V. Oakford and G. J. Thuesen 271

Estimating the Costs of Organizational Change—A Markov Chain Model
David L. Raphael 279

TRANSPORTATION

Transport System Planning: A Rail Example
M. J. Gerra and D. L. Spanton 291

VALUE ENGINEERING

The Relationship of Industrial Engineering to Value Engineering
Robert L. Crouse 301

IE/VE—A Functional Fit!
J. J. Kaufman 305

WORK MEASUREMENT AND METHODS ENGINEERING

Control of Work Measurement Standards—or "What's Going on in the Factory?"
W. Colebrook Cooling 311

Work Motivation Through Wage Incentives
Mitchell Fein 317

Development of Documentation Time Standards and Implementation of Appropriate Controls
Edward A. Schnabel 327

ORGANIZATION—PROGRAM PARTICIPANTS

Institute Officers, 1967-68 337
Conference Organization 338
Host Chapter Officers 338
Program Participants 339
